EXPERIENCE

PNC Solutions, Pakistan — MERN STACK DEVELOPER & TEAM LEAD

OCT 2020 - PRESENT

- Built a large SaaS web application in React for home inspection companies to manage every aspect of their business.
- Converted the above SaaS application to a Progressive Web App.
- Created a serverless Express API using Node.js and AWS Lambda for generating large and complex pdf reports.
- Implemented new features in already developed management system web apps in Angular.
- Mentored interns/junior members of my team and interviewed several candidates for Front-End positions.
- Contributed technical expertise in decision making processes.

Freelance, Pakistan — JavaScript Engineer (Part Time)

SEP 2021 - Present

- Developed a React Native e-commerce app for selling furniture on both iOS and Android with Augmented Reality feature. ([iOS](#) & [Android](#))
- Redesigned a React/Gatsby static site. (stylam.com)
- Integrated Web3 wallets in an NFT website and implemented a referral system in Php. (crowpunks.com)

Cryptozilla, Pakistan — Junior Software Engineer

DEC 2019 - SEP 2020

- Cryptozilla is a startup in the blockchain field. Cryptozilla developed an app that allows users to trade cryptocurrency on multiple exchanges using only one app.
- Developed new features and fix bugs in Cryptozilla desktop trading app(C#, WPF).
- Developed a website in React from scratch for Cryptocurrency statistics.

EDUCATION

Karachi Institute of Economics & Technology — B.S. in Computer Science
